See Las Vegas from 650 feet up.

This is truly a must see on your next visit to Las Vegas. The Eiffel Tower at the Paris is exactly one half scale size to the original in Paris France. Travel 650 ft up in the elevator to the look-out point. The door of the elevator is mostly glass, so if you are uneasy about heights don't stand by the door.

When you hit the top, you will be able to see a 360 degree view of the Strip. Directly across the Strip is the Bellagio Hotel Casino where you can see the The Fountains of Bellagio like a bird. Be patient though, that is the hot spot where crowds of people fight for the best view of the show. It took me 3 shows to be able to get these pictures.

The picture of the Strip is the south end where you will find, the Aladdin, Imperial Palace, Showcase Mall, MGM Grand, and the Tropicana on the left. The right side of the Strip hosts the, Monte Carlo, New York-New York, Excalibur, Luxor, the Mandalay Bay. For a complete map of the Strip [click here](#)
